FOR IMMEDIATE RELEASE

BVS Releases 700 MHz WiMAX Bundle Test Solution

METUCHEN, New Jersey. -- December 21, 2007 -- Berkeley Varitronics Systems, Inc, a global leader in WiMAX test equipment, has released a complete 700 MHz WiMAX propagation analysis solution.

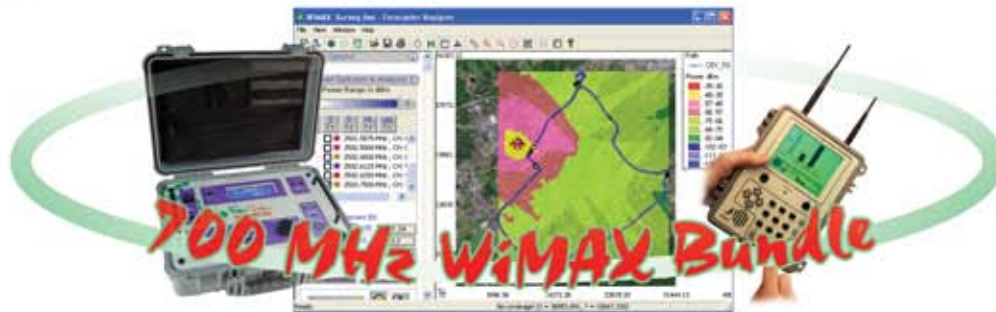

BVS' 700 MHz WIMAX bundle consists of their popular Gator Class A Transmitter, Coyote Modular Receiver System and Forecaster™ GPS Mapping Coverage Software. Berkeley will offer this bundle in 3 different configurations to give engineers a complete drive-study solution for the 700 MHz, 2.5 GHz and even 3.5 GHz bands.

"We have ramped up inventory on our 700 MHz transmitters and receivers in anticipation of the 700 MHz FCC auction slated for the end of January." said Scott Schober, CEO and President of BVS.

Over the past 12 years, BVS has shipped thousands of Gator™ Class A transmitters around the world making it one of the most recognizable stimulus transmitters available. Gator™ customers typically point out the product's light weight, ruggedness and reliability as its strengths.

For over 7 years, Coyote™ dual-channel receivers have been used in the field by numerous engineers and installers. All key components of the Coyote™ are hot-swappable in the field. Customers recognize this combination of modularity and performance as the greatest benefit to using Coyote™.

Forecaster was introduced back in 2006 and allows Coyote users to plot and view coverage of wireless networks in table or graphical windows with the ability to create HTML reports of base stations/antennae coverage and RF overlap areas. KML overlap reports may also be generated allowing coverage to be viewed using popular programs such as Google Earth™. Forecaster combines realtime Coyote measurements, GPS geo-coding accuracy and PC analysis.

About Berkeley Varitronics Systems (www.bvsystems.com or www.bvsystems.eu)

Berkeley Varitronics Systems (www.bvsystems.com) has been providing advanced wireless solutions and products to the domestic and international wireless telecommunications industry for over 35 years. Since 1995, BVS has introduced over 50 unique wireless test devices for a variety of applications including the popular Cellular, iDEN, PCS, CDMA, RFID, WIMAX, 802.11b/a/g & Bluetooth specifications.
