**FOR IMMEDIATE RELEASE**

## **BVS Releases Software for 802.11 Wi-Fi Monitoring From Anywhere**

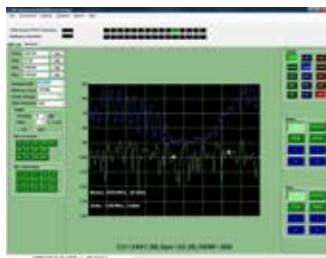

**METUCHEN, New Jersey. -- March 31st, 2008 -- Berkeley Varitronics Systems, Inc. has released remote management software for the Yellowjacket® 802.11 B/A/N/G Wi-Fi Analyzer receiver.**

Remote Manager™ is a powerful data monitoring and reporting application that utilizes BVS 802.11 receiver technology from anywhere in the world over standard 10/100 ethernet connections. The software controls the Yellowjacket® 802.11 B/A/N/G receiver remotely, collects RF spectrum and packet data in realtime and stores it in relational database powered by Microsoft's SQL Server Express®.

“Remote Manger software allows Yellowjacket® customers to perform basic RF studies over the internet without the need to spend time on site collecting and sifting through tons of data.”, says Scott Schober, BVS President & CEO.

Remote Manager software creates comprehensive Excel® and PDF data reports over various time periods for a temporal overview of any 802.11b/a/n/g network as well as unknown or suspicious 2.4 or 5 GHz sources of interference. Remote Manager software is available now for \$1,150 so call 1-888-737-4287 or visit [www.bvsystems.com](http://www.bvsystems.com) for your copy today. Software requires Yellowjacket® 802.11b/a/n/g Wi-Fi receiver and includes ethernet adapter and data cable to collect and process RF & packet data.

The Yellowjacket® 802.11b/a/n/g Wi-Fi Analyzer is a handheld receiver system that sweeps 2.0-4.0 GHz & 4.9-5.9 GHz while demodulating and measuring all 802.11 packets discovered including those for the IEEE 802.11b, a, g, h and n standards. The Yellowjacket's calibrated receiver technology allows it to perform complete spectrum analysis within  $\pm 1$  dBm accuracy and sports pro features such as user selectable thresholds, traces, peak holds and more. Yellowjacket utilizes an iPAQ for touch-screen interface and easy display and selection of any access point's SSID, MAC, RSSI, multipath, data rate, SNR and more.
