

Enhancements to YellowFin WiMAX Tablet Analyzer Software V1.30

December 2, 2009

Berkeley Varitronics Systems, a leader in providing advanced wireless solutions and products domestically and internationally to the wireless telecommunications industry has made several enhancements to their YellowFin WiMAX Demodulating Tablet Analyzer.

New enhancements for Individual Preamble Analysis for the YellowFin WiMAX Tablet Analyzer Software V1.30 are:

- * CINR vs. Time display added
- * Multiple RSSI filtering / averaging options added
- * Multiple CINR filtering / averaging options added

Also included in the enhanced version is a new Data Comparison capability now part of the YellowFin WiMAX Tablet Analyzer Software V1.30.

- * Combined CINR / RSSI vs. Time display added

“We have taken end-user feedback and responded to their specific needs. These new enhancements are not only for the benefit of our existing end-users but part of our aggressive R&D efforts for WiMAX solutions.” says Scott Schober, President and CEO of Berkeley Varitronics Systems.

BVS will have YellowFin WiMAX Tablet Analyzer demonstrations featuring these new enhancements throughout the day at the WiMAX Forum Show, Booth 52, December 2-3.
