

Hive™

Yellowjacket® Indoor 802.11 Wi-Fi Mapping Software

1 Create your floorplan:

Site Initiator

Create floorplans from scratch or from any BMP, GIF, JPEG, TIF

User defined objects for placement onto floorplan

Import existing floorplans for modification and surveys

Survey floorplans on a PocketPC. Create and organize survey maps on a PC.

Hive™ is powerful mapping software that works with Berkeley's Yellowjacket® 802.11 (B, A or B/G) Wi-Fi receiver system. *Hive™* runs on an iPAQ® Pocket PC® allowing site surveys to be handheld and performed completely **INDOORS** or outdoors using real-time mapping coverage technology. No GPS reception needed. First, import bitmap files into *Hive™* Site Initiator and scale your rooms and walls for measurement overlays. Walk through an office space, warehouse or multi-floor building - any interior space that needs to be surveyed - and take Access Point measurements with Site Supervisor. Then place those measurements on top of any structural floorplan to get a comprehensive, bird's eye view of any WLAN based upon MAC addresses, RSSI, SSID and more. Finally, view your Wi-Fi coverage results in table and graphical views using Site Investigator running under Windows 2000 and XP.

3 Organize and plot your coverage:

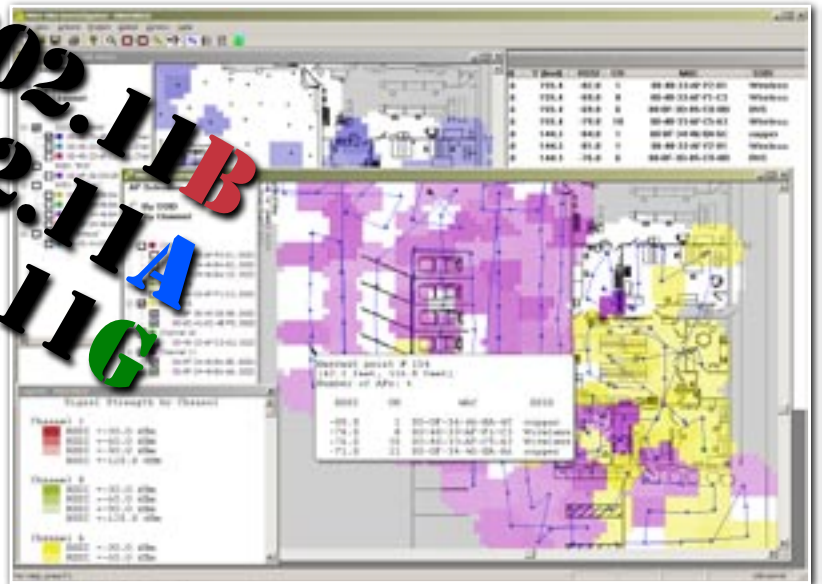

Site Investigator:

Plot and view surveys in multiple data table or graphical windows

Plot coverage by AP or AP groups

Print and export plots or table data into ASCII format for spreadsheets

Create RTF files that import into MS Word & most popular word processors

2 Take your AP measurements:

Site Supervisor

Touch-screen measurement points using PocketPC®

Customizable surveys based on MAC, RSSI, SSID

Take floorplan survey snapshots anytime

Visible survey path throughout floorplan

Auto-save after every measurement point taken

802.11B
802.11A
802.11G
